### FHFA House Price Index Unchanged in May; Up 5.7 Percent from Last Year

**Washington, D.C.** – U.S. house prices were **unchanged** in May, according to the Federal Housing Finance Agency (FHFA) seasonally adjusted monthly House Price Index (HPI<sup>®</sup>). House prices rose **5.7 percent** from May 2023 to May 2024. The previously reported 0.2 percent price increase in April was revised upward to 0.3 percent.

For the nine census divisions, seasonally adjusted monthly price changes from April 2024 to May 2024 ranged from **-0.5 percent** in the West North Central division to **+0.3 percent** in the New England division. The 12-month changes were all positive, ranging from **+2.4 percent** in the West South Central division to **+9.2 percent** in the New England division.

"U.S. house price movement was flat in May," said Dr. Anju Vajja, Deputy Director for FHFA's Division of Research and Statistics. "The slowdown in U.S. house price appreciation continued in May amid a slight rise in both mortgage rates and housing inventory."

The FHFA HPI is a comprehensive collection of publicly available house price indexes that measure changes in single-family home values based on data that extend back to the mid-1970s from all 50 states and over 400 American cities. It incorporates tens of millions of home sales and offers insights about house price changes at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports quarterly and monthly. The flagship FHFA HPI uses seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data, including refinances, Federal Housing Administration mortgages, and real property records. All the indexes, including their historic values, and information about future HPI release dates, are available on FHFA's website: <a href="https://www.fhfa.gov/HPI">https://www.fhfa.gov/HPI</a>.

The next HPI report will be released August 27, 2024 and will include data for the second quarter of 2024 and monthly data through June 2024.

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac, and the 11 Federal Home Loan Banks. These government-sponsored enterprises provide more than \$8.4 trillion in funding for the U.S. mortgage markets and financial institutions. Additional information is available at <a href="https://www.FHFA.gov">www.FHFA.gov</a>, on Twitter <a href="https://www.

### **Overview of FHFA HPI**

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. While FHFA produces the HPI by statutory mandate (12 U.S.C. 4542), it began in 1995 with predecessor agency, the Office of Federal Housing Enterprise Oversight. The initial reports only contained information about regional and national house price movements. But sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities with information extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite is often referenced as the "FHFA HPI" to reflect that we create all indexes in the same technical manner. The flagship FHFA HPI is the Purchase-Only Index, which uses seasonally adjusted, purchase-only data. This index is the most common choice for press releases, news stories, and social media. FHFA created additional indexes to address questions about house price changes in other market segments such as refinances, Federal Housing Administration (FHA) mortgages, or the entire single-family property market. Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available. Quarterly reports usually contain index flavors such as:

- "Purchase-Only" HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized
- "All-Transactions" HPI: Adds appraisal values from refinance mortgages to the Purchase-Only HPI data sample
- "Expanded-Data" HPI: Adds sales price information sourced from county recorder offices and FHA-backed mortgages to the Purchase-Only HPI data sample. We use this index to adjust the conforming loan limits, which establishes the dollar amount of loans that Fannie Mae and Freddie Mac can acquire.
- "Distress-Free" HPI: Removes sales of bank-owned properties and short sales from the Purchase-Only dataset
- "Annual" HPI. Uses the All-Transactions data but constructs indexes on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts

The summary table below details the frequency and geography of the available indexes.

	National	Census Division	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	<b>✓</b>	<b>~</b>						
Quarterly	<b>✓</b>	<b>✓</b>	<b>~</b>	<b>~</b>	<b>✓</b>			
Annual	<b>✓</b>	<b>~</b>	<b>✓</b>	<b>✓</b>	<b>✓</b>	<b>~</b>	<b>✓</b>	<b>✓</b>

FHFA builds the HPI suite on tens of millions of home sales and offers insights about house price fluctuations at various geographic levels. For more information, see the <u>HPI Frequently Asked Questions</u>.

### **FHFA HPI Release Dates for 2024**

Public FHFA HPI® releases occur at 9AM ET and include a press release, tables, figures, and associated data.

Date	Release Type	Latest Included Data
Tuesday, January 30	Monthly Index	November 2023
Tuesday, February 27	Quarterly Index (with Monthly Tables)	December 2023 and 2023Q4
Tuesday, March 26	Monthly Index	January 2024
Tuesday, April 30	Monthly Index	February 2024
Tuesday, May 28	Quarterly Index (with Monthly Tables)	March 2024 and 2024Q1
